## LINER GAUGE WITH EVERY CUMMINS® ISX15 INFRAME KIT

Eliminate the guesswork of sizing ISX15 liners by using the MCB9587 gauge. This "go/no-go" gauge is simple to use; Just place the liner on the workbench top down and slide the ring past the o-ring groove. If the gauge slides down to the liner seat, you have a 150mm liner. If the gauge stops before the liner seat, it is a 152mm liner. For a limited time Interstate-McBee will be including these free in ISX15 in-frame overhaul kits while supplies last. The MCB9587 gauge is also available for purchase. Contact us for details.

### Instructions

**1. Turn the liner upside down and fit the gauge around the outside.**

**2. If the gauge drops down to the liner seat, the liner is 150mm. If not, the liner is 152mm.**
