

RE-RING KITS

John Deere® MCIF6090

Volvo®/MACK® MCIFVED13

Caterpillar® MCIF3406E

WHAT ARE RE-RING KITS?

Pistonless inframe kits,
A cost-effective alternative to
buying a full inframe kit.

Includes liners, gaskets, bearings—
everything but pistons.

WHY CHOOSE A RE-RING KIT?

Modern steel pistons are designed to
handle higher thermal and mechanical
loads offering exceptional performance
and long-lasting durability.

In certain cases, an engine rebuild is
necessary but the pistons are still in good
shape and may not need to be replaced.

WHO SHOULD CONSIDER A RE-RING KIT?

If your engine has high quality steel
pistons installed, you may have the
opportunity to save time, money, and
reduce waste by reusing your pistons
during your next engine rebuild.

Interstate-McBee customers have
access to a wide selection of re-ring kits
designed for popular engines across a
diverse range of applications and OEMs.

**See reverse for our full
list of Re-ring kits**
