“Quality Without Compromise”

TOP SELLERS: GASKET KITS

Detroit Diesel®

A-A4720161920
APPLICATION: DD15

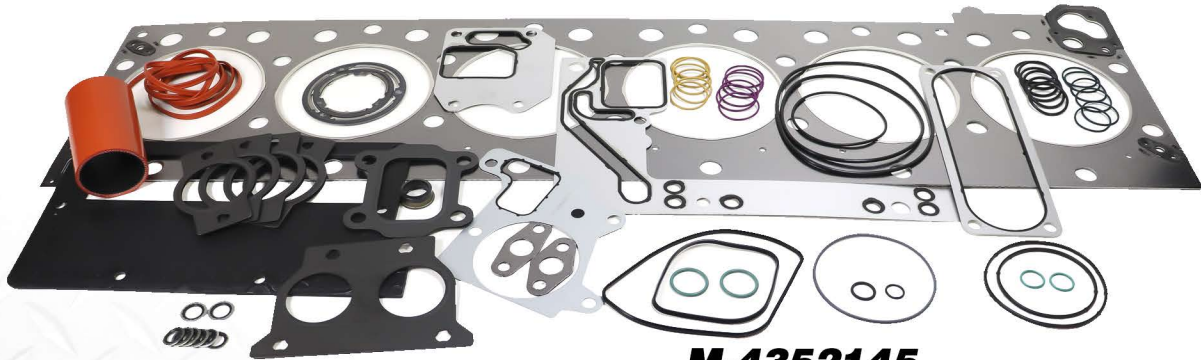

This kit includes a head gasket made of multi-layer steel (MLS) stainless steel for positive sealing and advanced polymer seals for water and oil passages to seal at high temperatures.

A-23532333
APPLICATION: S60

This gasket set includes a graphite composite head gasket with high temperature polymer seal rings.

Cummins®

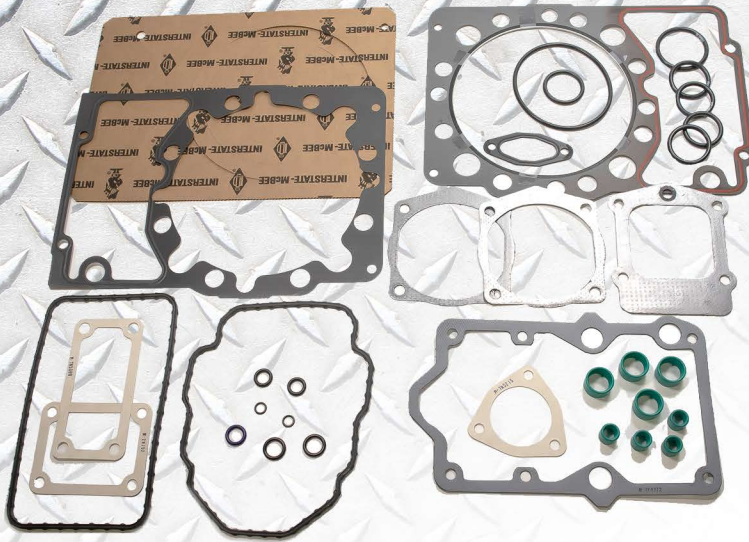

M-4352145
APPLICATION: ISX

Made from only the highest quality materials, this gasket set contains the latest designed head gasket for improved sealing ability.

M-4024945
APPLICATIONS: NT 855

This gasket set contains edge molded rubber head gaskets for improved sealing ability and the seals and gaskets necessary to replace upper engine components

M-3550762 **APPLICATION: G3500**

This kit includes the seals and gaskets necessary to change out one cylinder head. These seals and gaskets are made from high quality materials and engineered to ensure an exact fit.

MCBC15213 **APPLICATION: C15**

This kit includes:

- A graphite composite cylinder head gasket
- Cylinder head shim
- Fuel injector o-rings
- Exhaust sleeves

The seals and o-rings provided are designed to tolerate high temperatures to resist wear and tear.

MCBC13013 **APPLICATION: C13**

This gasket set includes a multi layer steel head gasket along with injector seals and the necessary seals and gaskets needed to replace a cylinder head.

Navistar®

M-1889245C95

APPLICATIONS INCLUDE: DT466E

Seal Kit

Gasket Set

Gasket Set

Head Bolt Kit

This kit includes:

- M-1889246C92 – Head gasket and head bolt kit
- M-1842624C92 – Seal kit: high pressure oil rail injector installation
- M-1842626C95 – High pressure oil gasket set
- M-1842623C96 – Turbo mounting gasket Set

General Gasket Information

We have an ever-growing line of curated custom gasket kits for your convenience. Not only does this make your life easier finding a kit to suit your needs, it also saves you money.

Our gaskets are made utilizing materials such as MP15® and HFL781® in order to perform without compromising functionality and sealing ability. Choosing materials for each gasket depends on temperature variations, pressure, and contact with a variety of fluids and surfaces.

® MP15 and HFL781 are registered trademarks of Interface Performance Materials
