Interstate-McBee injector features:

- 100% surface lapping of critical components ensures pressure sealing of sub-assemblies.
- Complete set of new installation o-rings for proper seal between the injector and the cylinder head.
- Laser etched part numbers for easy identification. (see Pic A)
- Factory installed filters which ensure proper seating.
- New plunger and barrel allowing for correct pressure and flow rate upon installation.

*=Verify CPL/ESN for proper usage
+=Returned cores must be "like for like" per core code
