

# Always Come Out Clean!

## Interstate McBee Offers The Solution.

Using our patented ECOTIP design, our exclusive “Extended Idle” Black Tag injector helps deter wet stacking and souping in locomotives that idle for long periods.

In addition, the Extended Idle injectors:

- Accommodate light or heavy loads
- Help extend the life of rings & liners
- Increase overall locomotive performance

Interstate offers a complete line of ECOTIP injectors for locomotive engines. Ask us which one is right for you.
