INTERSTATE-MCBBE.COM

Quality Without Compromise

When it comes to aftermarket products, it can be a gamble putting your trust in a new company. With Interstate-McBee you can rest easy knowing that for 75 years our goal has always been to offer the highest quality diesel engine parts in the aftermarket. We are ISO 9001:2015 certified, AAR certified and received the President's Award for Excellence in Export. We've carefully honed our craft over the years by focusing on our core pillars of quality:

- A large QA department that is fully committed to the highest standards
- Premium materials and top of the line machinery
- A team of experienced engineers with a range of specialties
- Attention to detail in all aspects of our operation
- A fully featured customer service experience for our dealers and distributors

Learn About Our Quality Assurance Program

5 Reasons WHY

USA Manufacturing

Since 1947, we have been manufacturing parts like gaskets, fuel injection components, and more at our Cleveland, Ohio facilities. Many of the additional parts we source come from factories throughout the USA ensuring quality that fulfills a global demand.

Extensive Parts Catalog

Simply put, our inventory is immense. Our current stock of 25,000+ part numbers covers a wide range of applications from popular on-highway engines to the obscure, niche markets and everything in between. We're constantly updating our website and our 15+ physical catalogs.

Worldwide Distribution

Interstate-McBee's vast distribution network, made up of hundreds of distributors in over 90 countries, enables customers to easily access the parts they need including hard-to-find specialty items and custom kits for specific engines.

Continuous Innovation

When it comes to product development, we've always taken a progressive approach, and it wouldn't be possible without our experienced team of visionaries. We are proud to maintain engineering teams for design, reverse engineering, custom solutions, and more to ensure we can meet the specific needs of the marketplace.

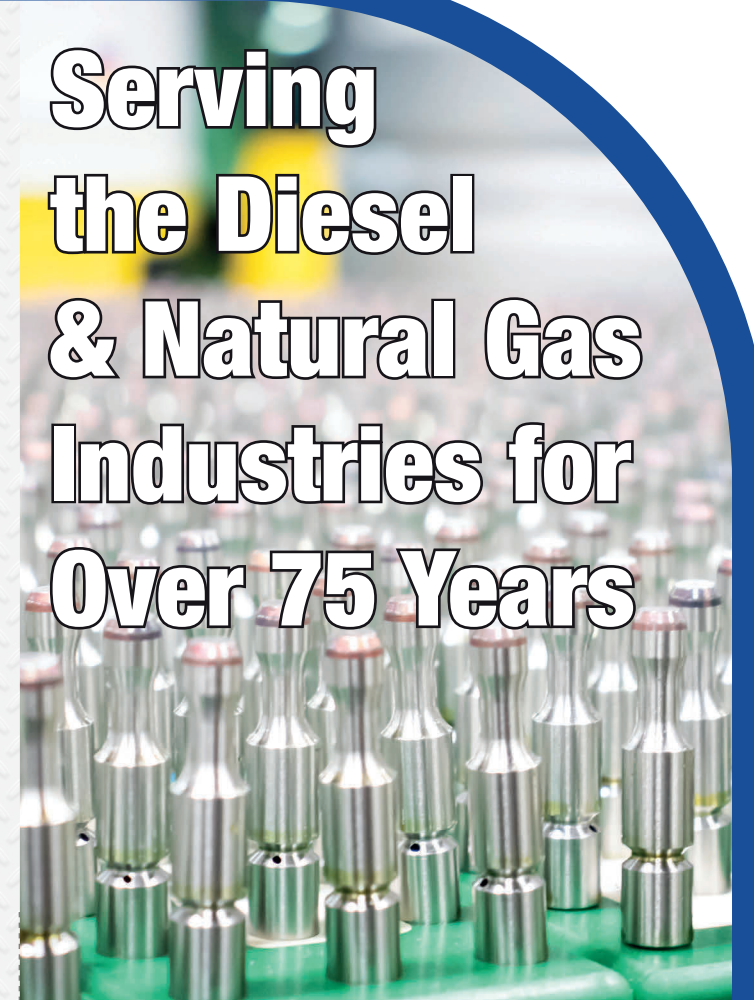

Quality Without Compromise

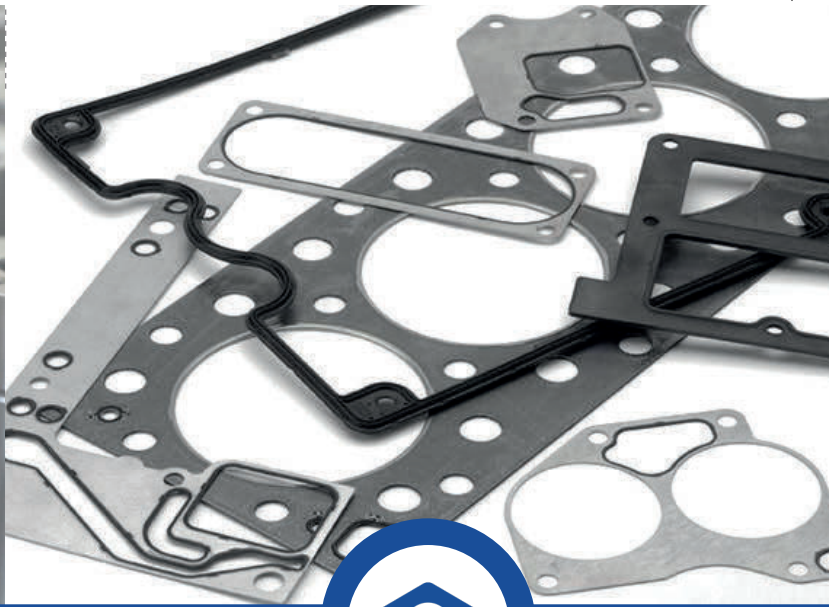

We prioritize quality in all aspects of our operation. World class manufacturing, engineering and customer service come together to ensure that every part bearing the Interstate-McBee name meets our industry leading standards.

Customers Continue to Choose Interstate-McBee

Serving the Diesel & Natural Gas Industries for Over 75 Years

USA Manufacturing

Since 1947, Interstate-McBee has been producing and sourcing parts and materials from prominent American manufacturers. We manufacture our own gaskets and remanufacture fuel injectors with new or like new parts, some of which are also manufactured here in our Cleveland, Ohio facilities.

We stand behind the expert craftsmanship that goes into our manufactured parts whether they are produced from scratch in-house or sourced from one of our highly accredited partners. At the end of the day, we're proud of the fact that our customers receive a superior product that, in many cases, has been customized to their specific needs. Some key things to remember about our manufacturing processes are:

- The raw materials we source are always the absolute best quality
- We utilize leading green machine, heat treatment and finishing technologies
- We are experts in metrology and are always on the lookout for imperfections
- Our parts go through strict assembly and testing processes

Extensive Parts Catalog

Interstate-McBee offers a diverse and wide-ranging collection of diesel engine replacement parts for some of the world's leading engines from Caterpillar®, Cummins®, Detroit Diesel®, Navistar®, John Deere® and more.

Whether you're a fan of physical catalogs, charts and foldouts or online parts directories, we have you covered on all fronts. It's easy for our dealers and distributors to stay competitive and profitable through our constantly evolving parts offering with over 25,000 items in stock across more than 100 engine applications. Our major markets include:

- On-Highway
- Construction and Mining
- Marine
- Natural Gas
- Rail
- Power Generation
- Transit and Refuse
- Agriculture
- And more

Worldwide Distribution

Providing our customers with access to the parts they need when they need them is one of our highest priorities. Our global distribution network allows us to reach the far corners of the globe with both popular and niche products, often at a fraction of the OEM price.

Our 200,000 sq. ft. United States distribution center maintains \$40+ million worth of inventory with a 95% order fill rate. Since 2004, we've added seven new facilities to our growing operations which include:

- Two Cleveland, Ohio manufacturing facilities
- Oakwood Village, Ohio world headquarters and distribution center
- Miami, Florida branch warehouse
- Los Angeles, California branch warehouse
- Houston, Texas branch warehouse
- Lincoln, Nebraska branch warehouse

Continuous Innovation

Our constant focus on improvement and evolution never ends and this mindset allows us to stay ahead of the curve as we embrace new products and technologies. Our team of 20+ degreed engineers use their 100+ years of collective OEM experience to ensure that we can deliver on our product development commitments, all leading back to the best possible outcome for the customer. We are proud to utilize:

- **Reverse Engineering** to replicate components that meet or exceed OEM requirements
- **Design Engineering** to create completely new designs
- **Custom Engineering** to offer custom tailored solutions for our diverse customer base
- **Manufacturing Engineering** to develop processes that yield the most consistent product possible
- **Industrial Engineering** to streamline our own operations which ultimately leads to savings for our dealers and distributors
