## Reman CAT® Injectors with Trim Code Files

Some of our remanufactured injectors are supplied with a CD ROM disc that contains a new unique trim code file which must be uploaded into the engine ECM. Many of the latest diagnostic tools used to upload trim code files no longer have the capability to accept CD ROM discs. In response to this change, we will now be supplying the trim code files on a USB flash drive that will be included in the box with each injector.

The change to a USB flash drive applies to the following injectors  
R-10R1273, R-10R2977, R-10R4761, R-10R3462, and R-10R4763.
