Core Return Guidelines

These items are applicable to ALL core returns:

1. All cores must be returned **freight prepaid** to:
Interstate-McBee
4901 Lakeside Ave.
Cleveland, OH. 44114
Attn: Core Return Department
International returns must be sent through customer's chosen freight forwarder as "DDP" (Delivery Duty Paid), including customs clearance paid and arrangement for pre-paid delivery all the way to the address above.
2. Cores must be received by Interstate-McBee no later than 60 days from date of invoice. Credit will not be issued for cores received after 60 days.
3. Only cores with the same group or core code classification as the exchange unit ordered will be acceptable (see <http://www.interstate-mcbee.com/warranty-policies.aspx> for Core Acceptance Catalog).
4. A packing list must be included with all core returns. The packing list must have company name, address, contact name and phone number plus detail quantity and identification of cores by one or more of the following:
 - a. Core code or core group
 - b. Part number
 - c. Interstate-McBee Invoice or Order number
5. If no invoice or order number is referenced on packing slip, credit will be issued to oldest outstanding invoice with corresponding exchange unit.
6. Core must be returned in protective packaging to prevent damage which may be caused during transportation.
7. Core must be in "off engine" condition as it was when originally removed from the engine.
8. Cores must be complete and cannot have been disassembled since being removed from the engine.
9. Cores damaged by non-operational causes such as rough handling, improper removal from the engine, fire or improper protection during storage will not be accepted.
10. Electronic injectors with broken stator terminals will not be accepted (see #9 above) unless otherwise noted in the Core Acceptance Catalog.
11. Light flash rust is acceptable, but heavy rust and/or pitting due to improper protection during storage is not acceptable.
12. Credit will be given only for cores owed. Additional cores received will be scrapped or returned at customer's expense. IMCB will not "Bank" excess cores.
13. The customer will be contacted by Interstate-McBee regarding any discrepancy and given 10 days to respond.
14. Broken tips (nozzles) on Cummins ISX & CAT 7000 (pencil) Series will NOT be acceptable, OK for all other.
15. Any rejected core will be returned to the customer at their expense if the request is received within 14 days from the date of rejection. After 14 days, rejected cores will be scrapped.

CAT® Pencil Nozzles

Cores are Like for Like Part Number.
Any damage to the tip is NOT acceptable.
Must have Part Number on the body.

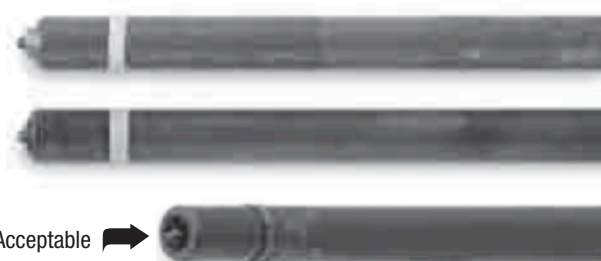

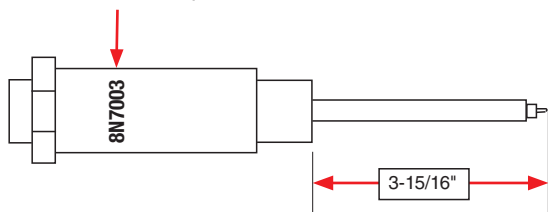

Example:
OR3422

Caterpillar 7000 Series Core (ORXXX)

These cores are only exchangeable by part number.

OE Part Number roll stamped here

Blown Tip: Not Acceptable

Caterpillar 7000 Series Cores with pushed in tops will not be accepted. Bent nozzles will also not be accepted. Any cores received with missing fuel lines will also not be accepted. Previously we could not accept any 7000 nozzle cores with a pushed out tip. Now some of these cores are acceptable but must measure within the specifications listed below.

When a new injector is rebuilt, OEM# should be "XXXXX" out. Reman numbers are typically etched on the major OD (can be very difficult to find & read)

Core Code	Reman Part Number	New Part Number		
C-OR3417	OR3417	8N7002	8N7003

INTERSTATE-McBEE

CAT® EUI - 3500

All CAT 3500 EUI with a 1 piece nozzle nut are acceptable cores. Core Code is C-3500.
Notice the difference in the angle of the stator/body between CAT 3500 and CAT 3406/C15 on previous page:

CAT 3500	CAT 3500 Old Style – Not Acceptable
 Example: R-20R0849 1 piece nozzle nut will have 2 flats on the nut.	 2 piece nozzle nut will have a hex (or flats) at 2 locations and is 2 separate parts.

INTERSTATE-McBEE

C-PTD	C-30B	C-41K
 3/8" Exposed 5-3/4" Example: M-3007465	 1-1/4" Exposed 5-1/4" Example: R-3275537	 1-1/4" Exposed 7-1/4" Example: R-3016676
This is a Cummins standard PTD core. Note that the spring is slightly exposed.	This is a Cummins 5/16 PTD core. It is smaller than the standard PTD core with a more exposed spring.	This is a Cummins K PTD core. This core is longer than the standard PTD core and the spring is much more exposed
C-T/S	C-36B	
 6" Example: R-3047977 Flange	 6" Example: R-3056342 Groove	
This is a Cummins standard Top Stop (T/S) core. Notice that the core does not have a visible spring on the top.	This is a Cummins L10 T/S injector core. It is very similar to the standard T/S core, but the standard T/S has a flange near the top, while the L10 has a groove. If in doubt, check the part number stamped on the injector.	

OK for the plunger to be missing. OK for the cup to be damaged.

ISX are Like for Like Part Number + Link + Matching Nozzle Number

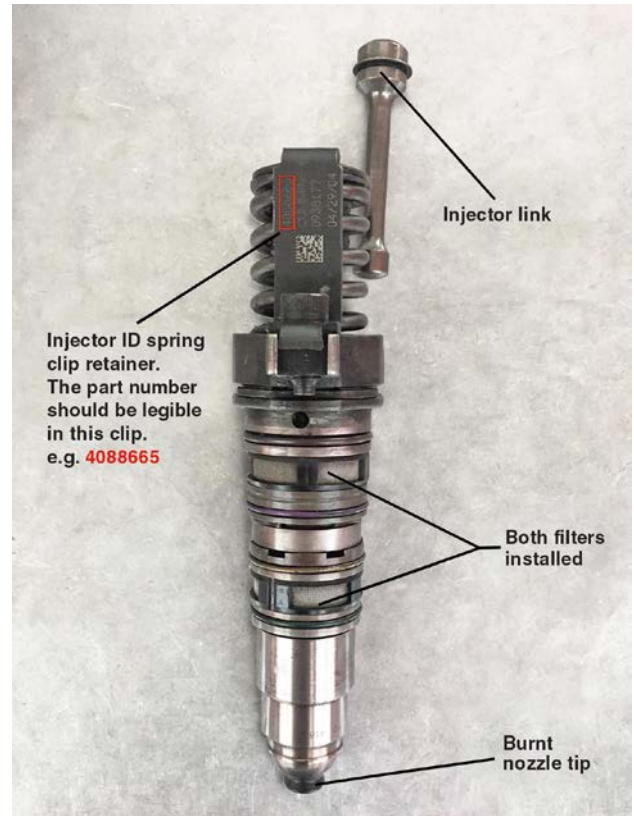

The nozzles should have a part number legible like the image below.

Some nozzles may have a QR code, which is acceptable.

The following characteristics are found in a good take-out core:

Identifying Fake and Genuine Nozzles

Cummins Marking
Acceptable

No Marking
Fake
Not Acceptable

Plugs
Acceptable

No Plugs
Fake
Not Acceptable

**Damaged / Broken ISX Nozzles
(Tips) Will NOT Be Accepted**

The table below shows the matching nozzle numbers with the injector part number:

Old Part Number	Injector Part Number	Core Code	Additional Requirement	Correct Matching Nozzle Number
4010225	R-MCB4062567	C-4062567	Core Link	3348357
4001791, 4010291	R-MCB4062568	C-4062568	Core Link	4088648, 3331242

Broken Stator Screws
NOT Acceptable

ISX Spring Retainers

Cummins ISX injectors are compatible with either of two injector load rings. The load ring located at the top of the injector body (see photos below) includes the spring retainer and is not injector part number specific. Both style load rings are made to fit all applications and are interchangeable within a single engine. Running an engine with one or the other or both styles will cause no loss in performance or any adverse effect. For additional information, refer to Cummins Technical Bulletin TSB100685 dated 23-May-2008.

Type A: Two-Piece, Bolted Retainer

Type B: One-Piece, Spring Retainer

Detroit Diesel® 53/71/92/8.2

C-NC9	C-71S	C-71H	C-82
 Example: R-5228900 2 Grooves Round Tip	 Example: R-5228580 Groove Pointed Tip	 Example: R-5228305 Groove Pointed Tip	 Example: R-5226270
This is a standard Detroit, N, C, 53, 71, 92 Series injector style. Please note that the nut on the NC9 has two smaller grooves.	This is a Detroit S injector core. Note that the body is similar to the C-NC9 core, but the nut on the S core has one large groove.	This is a Detroit HV core. The body is different than an NC9, and the nut has one large groove.	This is a Detroit 8.2L injector core. The 8.2L cores look the same, but the difference can be found by the letter stamped into the body clamp.
C-71C	C-149		
 Example: R-5228781 2 Grooves Round Tip		Pointed Tip 	Round Tip 
This is a Detroit HN core. The body is different than an NC9, and the nut has two grooves.			

NOTE: Tip may be broken, but never missing.

Detroit Diesel® Pumps & Exceptions

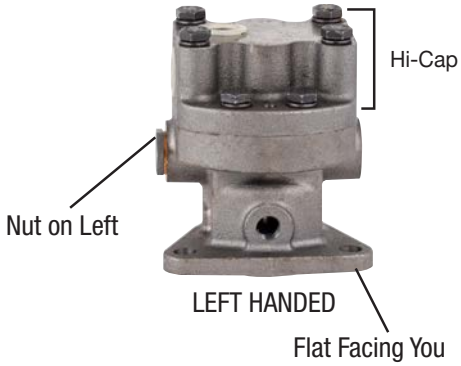

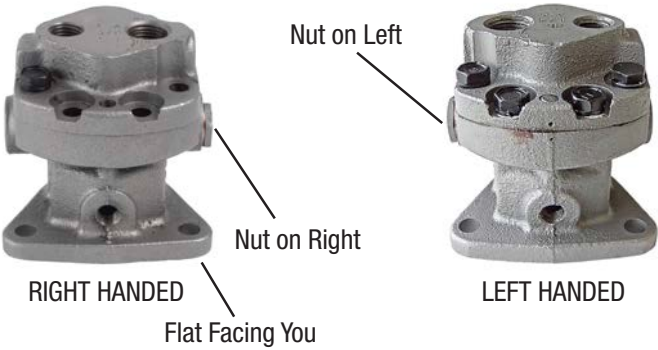

LV injectors have a 2 piece follower and are NOT acceptable.

Marine style filter caps have no threads. Cores sent for injectors ordered with Marine caps must also have Marine caps.

Part Number	Description
5199560	Fuel Pump - LH - 1/4
5199561	Fuel Pump - RH - 1/4
5199734	Fuel Pump - RH - 3/8 - Hi-Cap
5199735	Fuel Pump - LH - 3/8 - Hi-Cap
23532981	Fuel Pump - S60

DD13/15/16 Reman Injector

Series 60, DDEC Reman Injector

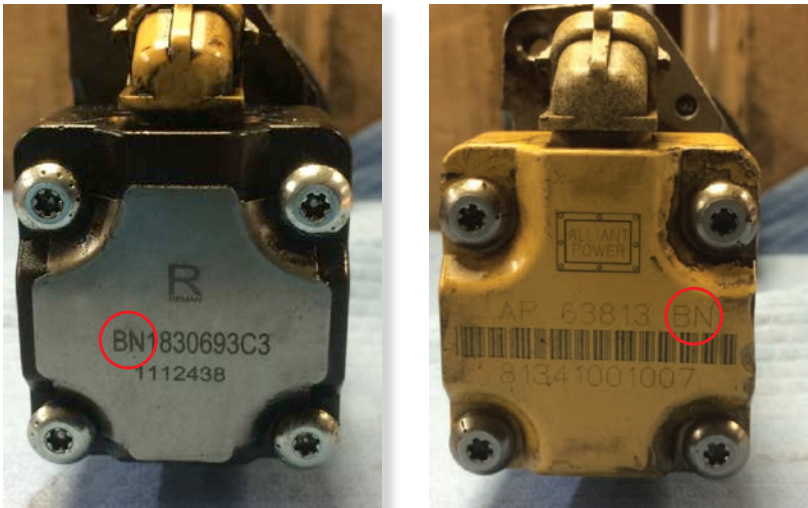

Series 60, 14L Reman Injector

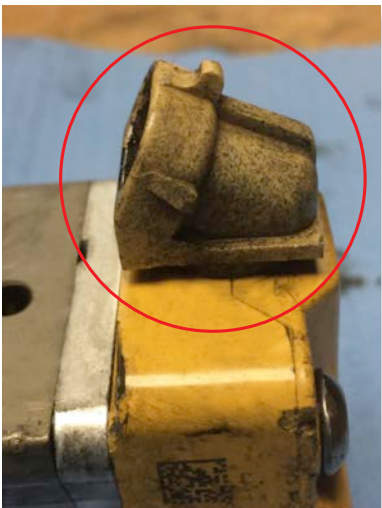

© Detroit Diesel is a registered trademarks of Detroit Diesel Corporation. All manufacturer's names, numbers, symbols and descriptions are used for reference purposes only and does not imply that any part listed is the product of these manufacturers.

On the TOP of the injector, look for the TWO LETTERS at the beginning (or end) of the injector part number. These two letters will identify the injector code. These injectors are both “BN”:

If there aren't two letters at the beginning or end matching a core code, the following are the OEM original injector part numbers and their respective core code:

Injector Code	Core Code
BD	C-466E-BD
BE	C-466E-BE
BF	C-466E-BFP
BG	C-466E-BFP
BI	C-466E-BFP
BJ	C-466E-BFP
BN	C-466E-BFP
BP	C-466E-BFP

The connector at the top of the injector must be intact. If it is broken or chipped the core is NOT ACCEPTABLE. The picture above is an acceptable connector.

*Part Number
Location*

Acceptable

- No electrical burn marks on plastic solenoid over mold (yellow plastic with dot matrix)
- Readable bar code or part # on the solenoid over mold
- Readable part # and serial # on the red/blue solenoid coil
- Bolts must be present and secure
- All 4 wires are intact, small “nicks” are acceptable
- Plastic connector is present, damage to plastic & bent pins are acceptable
- No damage to the nozzle
