NEW REPLACEMENT TURBOCHARGERS

As the cost of engine repairs and fuel continue to increase, complete turbochargers have become an increasingly crucial component for proper performance.

When in good condition and operating properly they help the engine produce rated power output and emission levels.

When not operating properly, less pressure is supplied to the cylinder causing the engine to operate at less than optimal efficiency resulting in considerable wear to engine components and a decrease in fuel mileage.

Interstate-McBee Turbocharger Features and Benefits

- ◇ All turbochargers are NEW – NO core exchange
- ◇ Competitively priced vs. remanufactured versions
- ◇ Manufactured to exacting standards for quick and accurate replacement
- ◇ Mounting bolts & nuts, gaskets & seal, and installation kits available

Interstate-McBee has put each of our turbochargers through rigorous quality assurance and field testing to ensure our customers the highest quality product.

And, as always, every turbocharger purchased from Interstate-McBee comes with our comprehensive 2 year unlimited mileage/hours warranty.

See reverse side for complete application chart
