LINER GAUGE AVAILABLE FOR CUMMINS® ISX15 INFRAME KITS

Eliminate the guesswork of sizing ISX15 liners by using the **M-5299587** gauge.

This "go/no-go" gauge is simple to use; Just place the liner on the workbench top down and slide the ring past the o-ring groove. If the gauge slides down to the liner seat, you have a 150mm liner. If the gauge stops before the liner seat, it is a 152mm liner. The [M-5299587](#) gauge is available for purchase. Contact us for details.

Instructions

1. Turn the liner upside down and fit the gauge around the outside.

2. If the gauge drops down to the liner seat, the liner is 150mm. If not the liner is 152mm.
