CUSTOM GASKET SETS FOR CAT APPLICATIONS

PART NUMBERS:

SIMPLIFIED FOR EASY ORDERING

The base part number for all three custom McBee kits in each series is the same. The last digit tells you the type of kit.

- **Overhaul** sets will always end in a "1".
- **Inframe** sets end in "2".
- **Head Gasket** sets end in "3".

This makes it easy to identify which set your customer needs based on the sub-kits required.

HOW COMPETITORS DO IT

- Modular style gasket sets sold separately
- Lots of numbers to look up
- Shipped in multiple boxes

HOW INTERSTATE-McBEE DOES IT

- One box holds everything
- Single part number
- All sub-kits & components neatly listed on inside lid

MCB prefix denotes this is a custom Interstate-McBee item.

Three digit code is created to note McBee custom gasket sets.

MCB**C15****092**

2 to 4 digits in the middle represent the engine application.

Last digit tells you what type of gasket set. In this case a "2" represents an inframe gasket set.

- Only one part number needed to cover multiple sub-kits for ease of lookup, purchase & inventory.
- Saves shelf space combining sub kits into one box.
- Less packages shipped to minimize cost & delays.
- Assembly process simplified for mechanics with all gaskets in one box and sub-kits clearly marked.
