WHAT ARE RE-RING KITS?

Pistonless inframe kits, a cost-effective alternative to buying a full inframe kit. Includes liners, gaskets, bearings—**everything but pistons**.

WHY CHOOSE A RE-RING KIT?

Modern steel pistons are designed to handle higher thermal and mechanical loads offering exceptional performance and long-lasting durability. In certain cases, an engine rebuild is necessary but the pistons are still in good shape and may not need to be replaced.

WHO SHOULD CONSIDER A RE-RING KIT?

If your engine has high quality steel pistons installed, you may have the opportunity to **save time, money, and reduce waste** by reusing your pistons during your next engine rebuild.

Interstate-McBee customers have access to a wide selection of Re-Ring Kits designed for popular engines across a diverse range of applications.
